Digital
IT Infrastructure

Server Compute

We design and implement server solutions across different platforms to serve different applications workload.

Backup & Archival

We periodically archive your historical data by efficiently addressing compliance and data retention requirement.

Disaster and Backup Recovery

Our simple solution to protect all of your data with cloud backup, disaster recovery, and archival.

Hybrid cloud

Our solution enables you to build and run with consistency across cloud, on-premises and edge environments.

Storage Solutions

We transform your business with a comprehensive storage solution that integrates your existing IT infrastructure.

Virtualization & Consolidation

We eliminate over-provisioning, increase server utilization and IT cost with server virtualization and consolidation.

Workplace and Collaboration

Our solutions enable changing workforce to collaborate and Connect in New Ways.

Structured Cabling

We Offer Fiber Optic Cabling, Structured Cabling Services, Data & Network Cabling with Supply & Installation.

Intelligent
Security

Advanced Security for Business

Get endpoint security with multi-layered protection against known, unknown and advanced threats.

Network Audit & Monitoring

We support you to monitor all systems, devices, traffic & applications of your IT infrastructure.

Network Security & design

We help you to protect against the most sophisticated cyber-attacks and identify the patterns quickly.

Enterprise Security solutions

We offer comprehensive protection to solve your biggest cybersecurity challenges.

Endpoint Control & Security

Get complete protection that works across all your desktops, laptops, servers, and mobile devices.
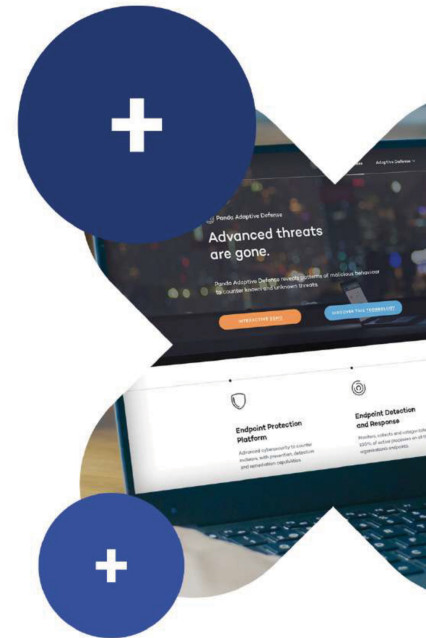

Email & Web Security

Help to proactively monitor web traffic to avoid threats such as malware, identity theft and phishing scams.

Cloud Security

Our Cloud Security products deliver a broad, effective security solution for your multi-cloud world.

Wifi Security solutions

We offer wireless security solutions for building strong security to protect valuable corporate data.

Business
Communication

Unified Communications

We provide you with one-stop access to voice, video, team chat, calendar, meetings and more.

Video Conferencing

We bring people together, face-to-face, no matter where they are or what device they use.

Cloud

We give your employees the power to reach out the problems with clear and reliable calling -all in cloud.

Contact Centers

We provide your team with the tools they need for accurate contact routing and faster resolution.

Remote Work and Collaboration

We help to determine the best combination of cameras & monitoring solutions for your needs.

Application
Services

Microsoft Azure

Get End-to-end Security Services with Azure Managed Services. Our experts help you to protect your cloud.

Intelligent ERP

We offer a tool to centralize critical data in a database that all sectors of the company can use to improve processes.

Attendance Management

Automate, improve HR efficiency, employee engagement & create happier work places with intelligent software.

Enterprise Network Monitor

We offer solution which can manage your network, servers, network configuration and fault & performance.

Amazon Web Services (AWS)

By leveraging the power of AWS cloud solutions, we help you to scale your business specific solution at faster pace.

Cloud HRMS Software

We help you to Reach out to employees and handle all your HR activities from anywhere.

Document Management System

We help you to Build, organize, and collaborate on work in one place from virtually anywhere.

Wireless
Solutions

Indoor Wireless Solutions

We specialize in designing and implementation of high-speed indoor wireless network from single to multi.

Point-to-Point (PTP)

Our PTP backhaul solutions provide proven reliability and performance, even in the most demanding environments.

RF & Microwave Solutions

Our solution ensures greater first-pass design success with proven simulation technology.

Outdoor Wireless Solutions

We extend connectivity beyond the building and deliver access to people, applications, and network resources.

Point-to-Multipoint (PMP)

We provide reliable, high-speed connectivity to multiple endpoints scattered over a wide area.

CCTV
& Surveillance

Security Camera Systems

We design the most suitable security system for your business or home, based on your preferences.

Video Surveillance Software

We provide Intelligent video monitoring software utilizing the highest levels of available technology.

NVR & Video Recording Servers

We offer network video recording servers (NVR) to meet the needs of any surveillance environment.

Wireless Video Surveillance

We offer Wireless surveillance systems by making it easy to monitor remote locations.

Video Monitoring System

We help to determine the best combination of cameras & monitoring solutions for your needs.

Storage Solutions

We never leave your sensitive data; we offer reliable & scalable storage solutions across UAE.
